

Aniello Tortora

Date of birth: 01/1997 | **Nationality:** Italian | **Gender:** Male | **Phone:** (+31) 686258143 (Mobile) | **Email address:** tortora.aniello.ta@gmail.com | **LinkedIn:** <https://www.linkedin.com/in/devnek97/> | **Github:** <https://github.com/Nek97> | **Address:** Netherlands (Home)

● ABOUT MYSELF

Experienced software engineer with a career spanning project management and hands-on coding, frequently guiding teams through complex tasks. Prepared for technical leadership and mentoring, utilizing a multifaceted approach to deliver effective solutions ranging from standard fixes to highly creative out-of-the-box ideas. Method emphasizes practicality and efficiency, consistently pushing boundaries to meet demanding goals by merging technical rigor with innovative problem-solving

● SKILLS

Digital Skills

JavaScript | MySQL | NestJs | Docker | PHP | Git | Gitlab, Gitlab Workflows | Node.js | TypeScript | REST e GraphQL API | MongoDB | Jest/testing-library | Github, Github Actions, BitBucket | NPM / Yarn | DynamoDb | CI/CD | Kubernetes | PostgreSQL

Management and Leadership Skills

Team Mentoring | Adaptability | Technical Leadership | Architectural Analysis | Problem Solving | Project Management | Neurodivergent

● WORK EXPERIENCE

08/04/2024 - 30/06/2026 - ITALY

BACKEND ENGINEERVITA HEALTH

- Maintained and optimized a legacy PHP and MySQL backend, subsequently migrating the infrastructure to AWS EC2 and shifting core services to a Node.js and TypeScript stack.
- Refactored the database architecture from DynamoDB to PostgreSQL to enhance data structure and system maintainability.
- Built CI/CD pipelines, documented system architecture, and modularized the codebase for improved scalability.
- Developed complex algorithms specifically for personalized diet and workout generation.

02/01/2023 - 31/03/2024 - SALERNO, ITALY

FULLSTACK DEVELOPERFINANZA.TECH

Developed the public portal and internal administration system, managing product purchase flows and Stripe integrations. I designed advanced algorithms to parse company reports and automatically reconstruct complex corporate structures, entity networks, and beneficial ownerships, constantly balancing fast delivery with deep technical adaptability across multiple stack layers

Website: <https://portal.finanze.tech/>

04/01/2021 - 31/08/2022 - AMSTERDAM, NETHERLANDS

BACKEND DEVELOPERBITVAVO

- Acted as the ultimate technical escalation point, performing high-stakes, live troubleshooting and debugging on mission-critical AWS Lambda transaction pipelines.
- Spearheaded the architectural design and implementation of distributed microservices, ensuring high

availability, security, and systemic scalability.

- Engineered the core administration panel for the support team and architected a robust, multilevel RBAC authorization system to secure internal operations.
- Authored, published, and maintained the open-source nest-ylc library, driving code standardization and efficiency across multiple R&D projects

Website: www.bitvavo.com | **Link:** <https://github.com/Nek97/nestjs-ylc>

01/06/2016 - 31/10/2020

SOFTWARE DEVELOPER FREELANCING

- Delivered end-to-end full-stack solutions across multiple independent projects, including e-commerce systems, a desktop launcher (Azeroth Shard), custom CMS modules, and comprehensive B2C web applications.
- Managed all project phases from structural analysis to the implementation of interactive frontends (React, Angular) and robust backends.
- Integrated external tools and APIs, such as Google Maps and payment gateways, while resolving critical server-side and client-side bugs to ensure high performance
